

ST. CLAIRSVILLE

AREA IMPROVEMENTS

An AEP Company

BOUNDLESS ENERGY™

AEP Ohio representatives plan power grid upgrades near St. Clairsville. Upgrades involve constructing about 1 mile of 69-kilovolt (kv) transmission line, rebuilding about 12 miles of 69-kV transmission line and installing equipment to improve the operation of the power grid.

WHAT

The project involves:

- Constructing about 1 mile of power line
- Rebuilding about 12 miles of power line
- Replacing wooden poles with steel poles

WHY

The improvements:

- Replace wooden poles that date back to 1925
- Strengthen the local power grid
- Reduce the likelihood of power outages.

WHERE

The power line travels through Belmont and Harrison counties.

Plans involve rebuilding a majority of the line in AEP Ohio's existing right-of-way, although study segments are being evaluating near the city of St. Clairsville.

PROJECT SCHEDULE

*Note: Timeline subject to change.

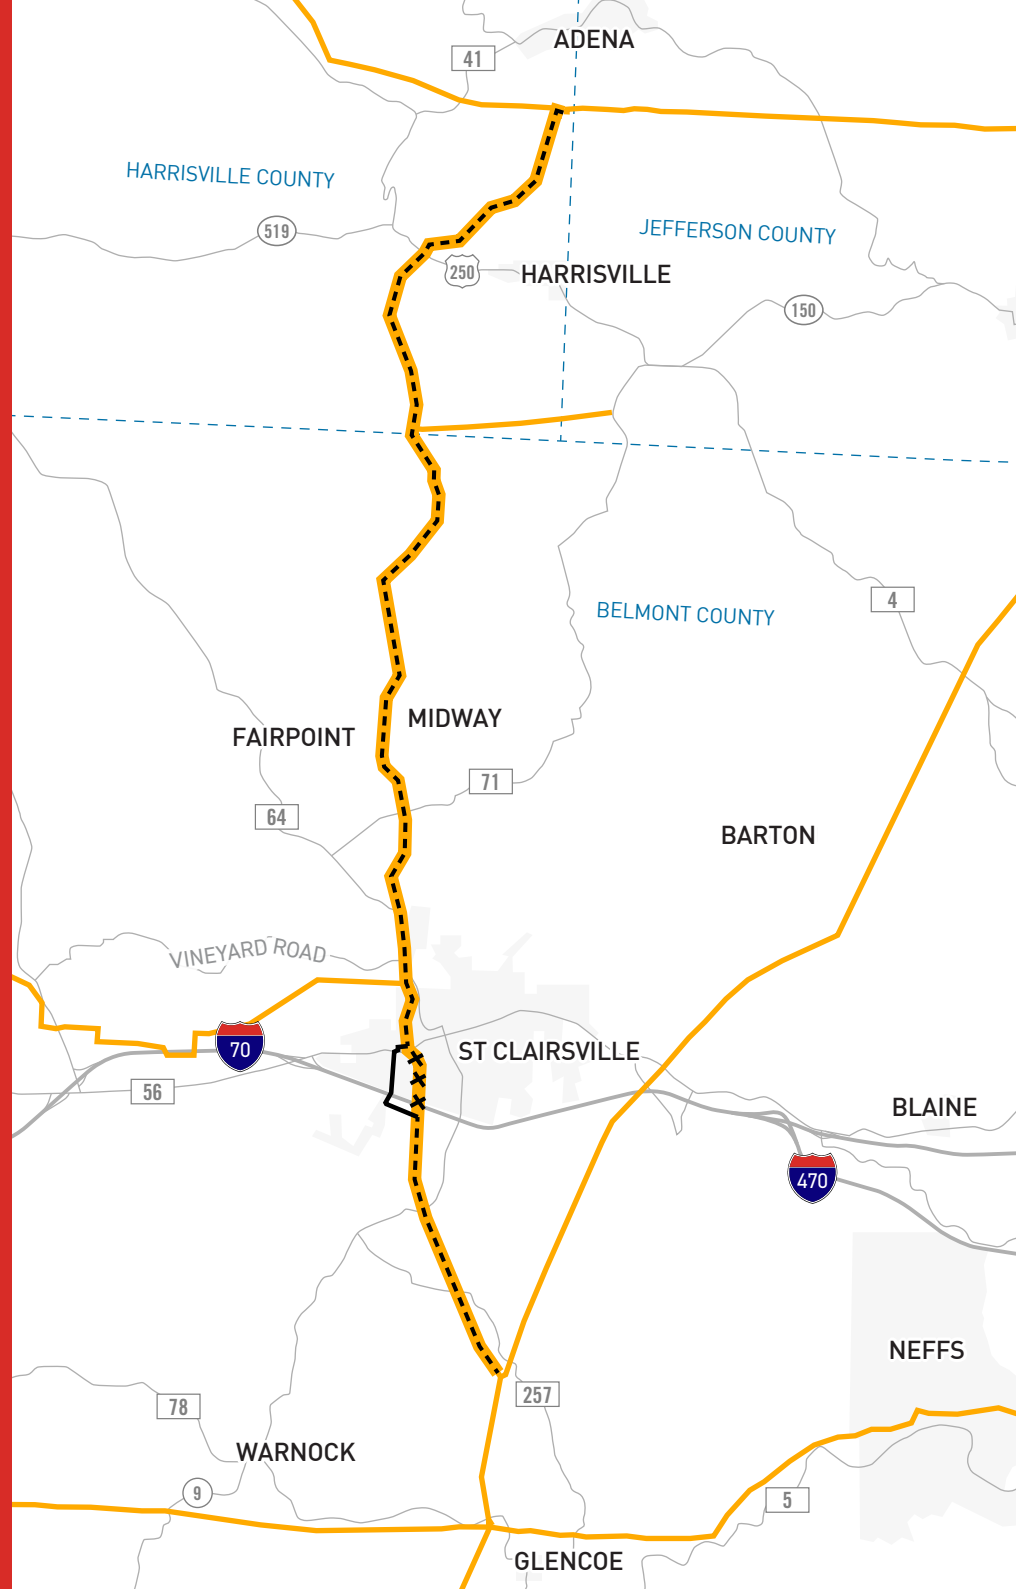

TYPICAL STRUCTURES

The project involves replacing wooden poles with steel poles.

Structure Height: Approximately **95 feet***

Right-of-Way Width: Approximately **60 feet***

*Exact structure, height and right-of-way requirements may vary
