

NOTICE OF PROPOSED MAJOR UTILITY FACILITY

AEP Ohio officials have proposed a transmission project in Lawrence and Scioto counties

AEP Ohio representatives plan to rebuild about 35 miles of 138-kilovolt (kV) transmission line between Millbrook Park Substation off Millbrook Avenue in New Boston and the South Point Substation near Glendon and Scioto avenues in South Point. The existing transmission line includes 90-year-old lattice towers and has shown significant deterioration resulting in service interruptions. Upgrading to modern steel poles reduces the need for ongoing power line maintenance and improves electric reliability. If approved, company representatives expect construction to begin fall 2025 and conclude late 2031.

AEP Ohio representatives have filed a Letter of Notification with the Ohio Power Siting Board (OPSB) as the South Point - Portsmouth 138 kV (Millbrook Park - South Point) Rebuild Project, Case No. 24-0830-EL-BLN. The Letter of Notification to construct, operate and maintain this facility awaits OPSB review. The OPSB accepts motions to intervene in the Letter of Notification up to 10 days following the publication date of this notice. The requirements to intervene are included in Rule 4906-2-12 of the Ohio Administrative Code. Please address motions to the Ohio Power Siting Board, 180 E. Broad St., Columbus, OH 43215-3793 and cite Case No. 24-0830-EL-BLN.

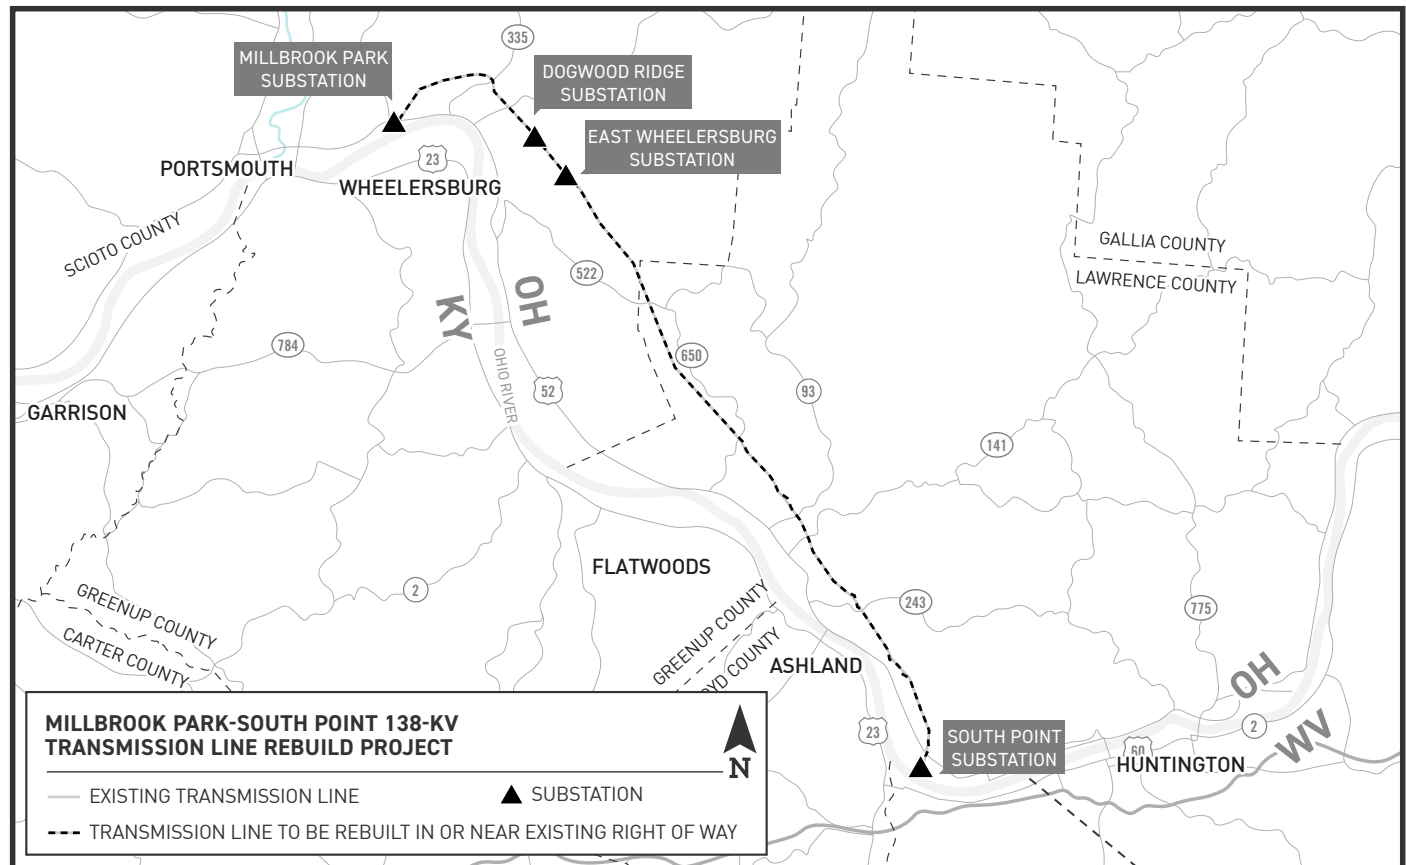

The accompanying map shows the project area. Please use this map only as a general guide due to its reduced scale and limited detail. Copies of the Letter of Notification, including specific details about the location and construction, are available for public inspection at the following locations:
