

NORTHEAST JACKSON

138 KV TRANSMISSION LINE PROJECT

An AEP Company

BOUNDLESS ENERGY™

AEP Ohio plans to improve the electric service reliability and upgrade the transmission infrastructure in the city of Jackson. The Northeast Jackson 138 kV Transmission Line Project is part of the overall Jackson-Ross County Area Improvements. The project includes upgrading about 5 miles of transmission line. Projected costs of the upgrades are approximately \$7 million. The upgrade is needed to accommodate future growth in the region by strengthening the electric infrastructure.

WHAT

The project involves upgrading approximately 5 miles of transmission line. The transmission line will be built within existing right-of-way. AEP Ohio may be supplementing current easements to accommodate for a 100-foot right-of-way corridor.

WHY

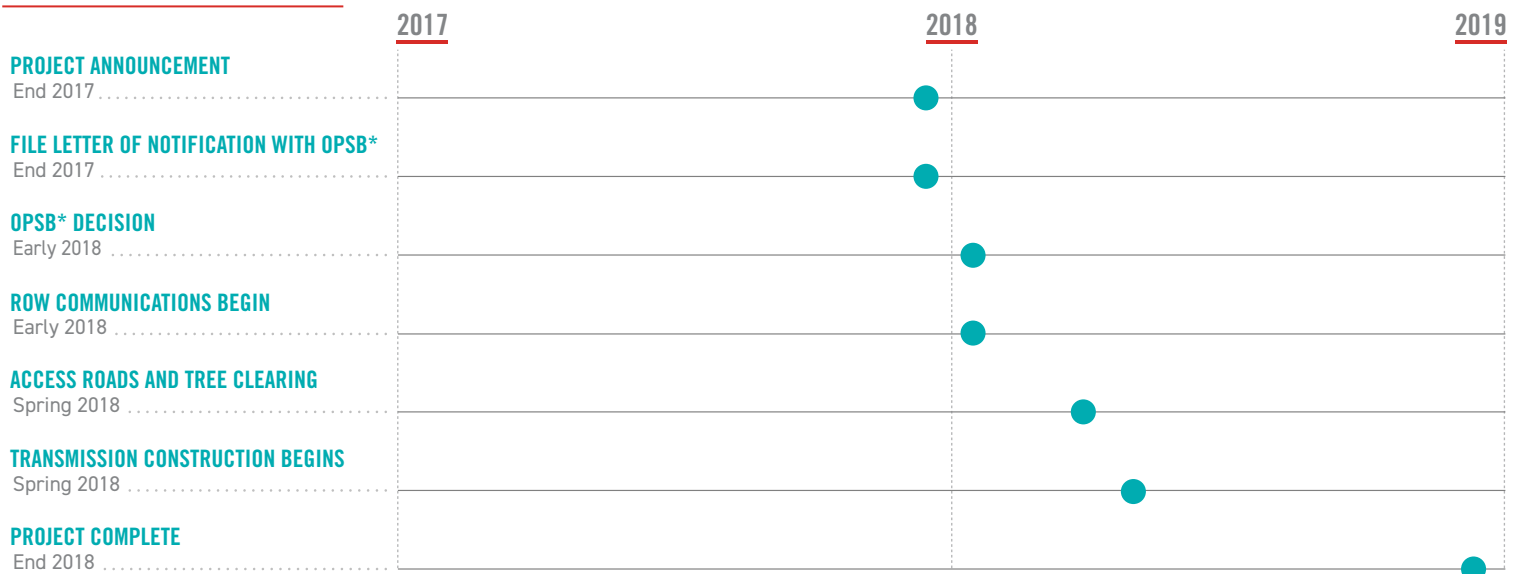

This project is driven by the economic development in the city of Jackson and surrounding area. The upgraded transmission line will allow for new businesses to come into the area and allow existing companies to expand. Replacing aging equipment with modern structures and wires provides the city with a more reliable power source.

WHERE

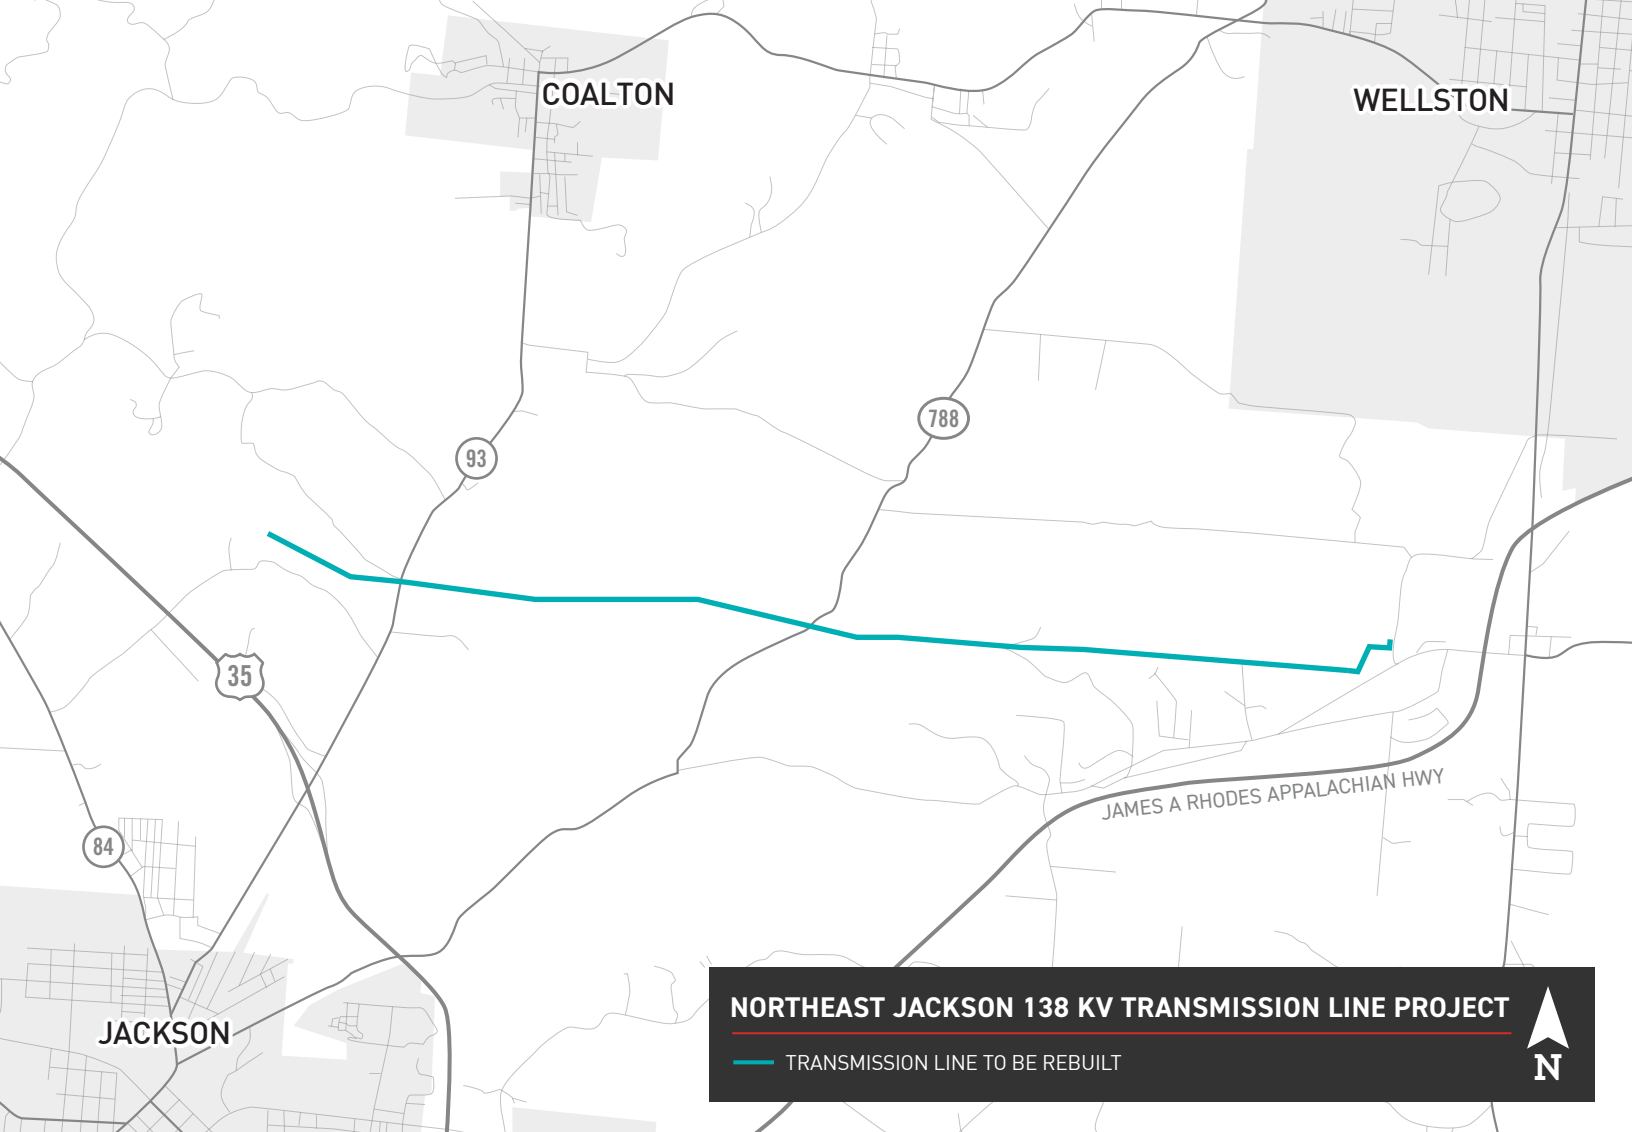

The transmission line runs through Coal and Lick townships and the city of Jackson in Jackson County.

PROJECT SCHEDULE

*Timeline is subject to change. *OPSB (Ohio Power Siting Board)

NORTHEAST JACKSON 138 KV TRANSMISSION LINE PROJECT

— TRANSMISSION LINE TO BE REBUILT

TYPICAL STRUCTURES

Proposed structures will vary depending on location. The project will use several structure types including steel single pole and H-frame structures that will be about 90-feet tall. The structures will be placed in an approximate 100-foot wide right-of-way corridor.

*Exact structure, height and right-of-way may vary
